

STRADA II.
A VERSATILE CERAMIC
RANGE WITH STYLISH,
CONTEMPORARY
CURVES.

OUR APPROACH

For decades, we've been serving architects, contractors, trade partners, and plumbers worldwide with high performance products like the rimless toilet or the ultra-flat shower tray. But the market has never been more demanding than it is today. Your clients and end-users are looking out for improved sustainability and advanced performance. They expect beautiful, lightweight design. We design with the demands of modern life in mind: pushing ourselves to achieve new levels of efficiency, offering elegant and impactful design. Meanwhile, our decades of experience have taught us that there's always a better, more intelligent solution. Which is why we never rest until we've found a way to offer you and your clients a higher standard of performance.

THE STRADA II RANGE

Building on the success of the original STRADA range, STRADA II features the softer angles, finer edges, and more contemporary curves that customers are increasingly looking for. It also sets new standards for design, efficiency, hygiene, ease of installation and maintenance. The STRADA II range of vessels, vanities, basins, toilets and bidets gives you greater flexibility in creating contemporary bathrooms for any project requiring a practical and premium solution.

THE RANGE RESTYLED

The new aesthetic of STRADA II retains the distinctive geometric shapes of the original STRADA, but with softer angles created by leading industrial designers Studio Levien. From basins to toilets and bidets, all the elements complement each other perfectly, so it's simpler to mix and match individual solutions within the range. Its vessels and vanities are also compatible with furniture from Ideal Standard's TONIC II, CONNECT AIR, TESI and ADAPTO ranges, which along with different finishes, offers countless options and even more flexibility for your design.

Whether you are renovating or developing a new project, STRADA II delivers the perfect combination of flexibility and functionality to design the bathroom that answers your clients' needs.

FEATURES

- 1 Soft, geometric design
- 2 AquaBlade® technology on all toilet models for superior hygiene
- 3 Invisible fixation maintains clean lines and elegance
- 4 Slim, easy take-off seats and covers for easier cleaning
- 5 Compatible furniture ranges to enhance bathroom design

"We would describe our new design as "gentle minimalism". The soft corners of the basin edges are much thinner."

Robin Levien, Cofounder & Head of Design,
Studio Levien

A WHOLE COLLECTION OF CURVES

To create a next-generation bathroom range that builds on the success of the original STRADA, we have drawn on the expertise of international industrial designers for STRADA II. Our collaboration with Studio Levien has led to softer geometric shapes with more contemporary curves to address today's aesthetic tastes. With STRADA II, your bathroom design is certain to be on trend.

STRADA II can enhance any specification, because the large variety of vessels, vanities, basins (with or without tap holes and overflows), toilets and bidets has been designed to allow you to flexibly combine elements and complementary furniture solutions.

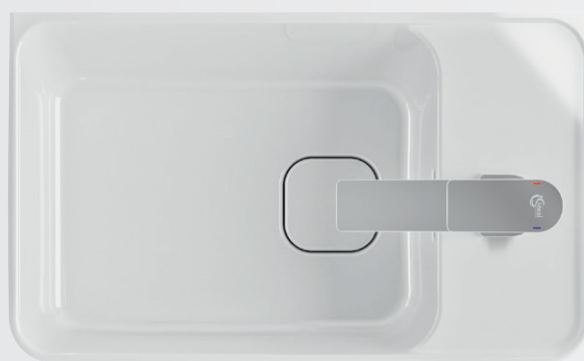

THE MOST FLEXIBLE BASIN RANGE

STRADA II has basins to satisfy every design need. With vessels, vanities, under-counter, semi-countertop, and handrinse models available, the range is suitable for every type and size of project – even guest solutions.

Models are available in sizes ranging from 38cm to 120cm and can be specified with or without overflows and tap holes.

Ceramic waste cover is included, and a click-clack metal version is also available separately

"I believe that our new version of STRADA maintains the essential simplicity but the softer, lighter design is what's required for years to come."

Robin Levien, Cofounder & Head of Design,
Studio Levien

Elegant, thin rim

bathroom designs

A number of models
feature distinctive
design elements
such as a clever
rim to help prevent
objects falling
from the deck

FLOWING WITH FUNCTIONALITY

All STRADA II toilet bowls are equipped with AquaBlade®. Launched in 2015, AquaBlade® is the patented Ideal Standard innovation for superior flushing, even at low water volumes.

100% OF SURFACE FLUSHED CLEAN

With a more intelligently designed and positioned channel and a smooth, gently curved surface, AquaBlade® cleans 100% of the inner bowl below the channel, outperforming all existing toilets to deliver the highest levels of hygiene and cleanliness.

PREVENTS SPLASHING. IMPROVES HYGIENE.

Lucideon, the independent materials development and commercialisation organisation, has independently tested AquaBlade® against one of the bestselling rimless toilets in Europe. The results are: where 20% of splashes come from dirty bowl water for the rimless, AquaBlade®'s optimised water pressure and smooth curves prevent all splashes from dirty bowl water.

EASIER TO KEEP CLEAN

AquaBlade®'s improved hygiene also considerably reduces the need for cleaning. Its perfect combination of elegant design and efficiency results in savings on time and cleaning materials.

LESS NOISE

AquaBlade® is quieter too. Its flush has been proven to be 62% quieter than competitors' rimless bowl models and 25% quieter than a standard flush.

AquaBlade® was tested by the independent materials development and commercialisation organisation Lucideon

cleaning time

BOWLS WITH BENEFITS

Whether wall-hung or back-to-wall models, bowls and bidets in the STRADA II range all feature ingenious invisible fixations. They maintain the clean aesthetic coolness of the bathroom. They're also designed for simple installation and make cleaning easier too, with no nooks or crannies where dust can collect.

STRADA II bowls are fitted with easy-to-take-off seats and covers, for normal and soft-close versions, which allow for quicker cleaning, leading to time and, therefore, cost savings.

SOFT-CLOSE SEAT

The slim, attractive seat is silent and safe

MORE COMFORTABLE

The inner rim of the seat is more rounded for extra comfort

REMOVABLE SEATS AND COVERS

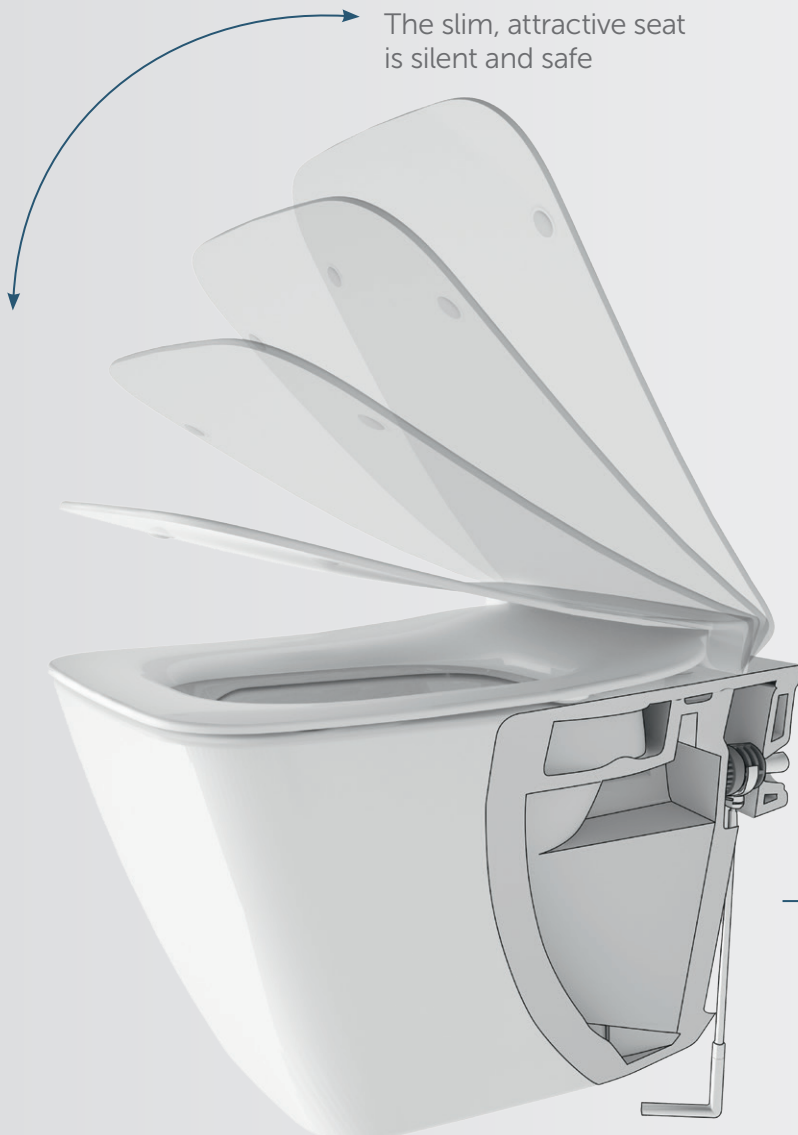

Simply unclip the seat to clean underneath

SAVE WATER

TESI furniture range

ADAPTO furniture range

A STYLE FOR ALL SPACES

STRADA II help you design bathrooms with practicality, elegance and flexibility.

STRADA II is compatible with many different Ideal Standard storage solutions including the TONIC II, CONNECT AIR, TESI and ADAPTO ranges. Each furniture range comes with a set of finishes to choose from such as glossy white, dark wood, light blue or glossy grey. Match the finish to the bathroom atmosphere you want to create.

BASIN UNITS

STRADA II compatible furniture echoes the cool lines of the basins and vessels while delivering storage space that declutters. For that extra touch of luxury, all models come with soft-close doors and drawers.

CABINETS

With a range of different heights, Ideal Standard cabinets allow for vertically increased storage rather than crowding the bathroom space with wider units. For flexibility, many of the cabinets are available with a choice of right or left-handed doors.

MIRRORS AND LIGHTS

Ideal Standard also has a range of mirrors, mirror cabinets and lights to complement Strada II, which can add an elegant finishing touch to your bathroom design.
